

Welcome

Thank you for purchasing your Kampa vestibule. Please read these instructions carefully before attempting to set up and retain for future reference. If used properly, your vestibule should give you years of trouble free use. We recommend that your vestibule is insured against accidental and storm damage as this is not covered by the warranty.

Your tent and vestibule are designed for use in light to moderate weather. During strong winds or snowfall we recommend that you take your tent down. The tent is designed for touring use; it is not designed for static or commercial use.

We recommend a trial run before using your tent and vestibule for the first time. This will allow you to familiarise yourself with the tent, its set up and any limitations the tent and vestibule may have for your particular use.

SET UP

1. Locate the zip at the top of the front AirPole and zip the vestibule on.
2. Ensure that the door is closed.
3. Peg the vestibule corners taught, as you would with the tent.
4. Peg the remaining intermediate pegging points.
5. Peg the front guyline so that the tent is under tension without distorting the shape.
6. The vestibule comes with a separate groundsheet. Install the vestibule groundsheet by attaching the toggles on the groundsheet, to the corresponding 'O' rings situated around the inside of the vestibule.
